The 12th annual BAST workshop, co-sponsored by the Stanford University Center for Reliable Computing (CRC) and the IEEE Computer Society Test Technology Technical Council (TTTC)*, will be held February 25 - 28, 2003, in Santa Rosa, California. BAST is an informal workshop whose objective is to bring together engineers from the Pacific Northwest region to discuss current work on testing electronic circuits. Programs and reports from previous BAST workshops are available from the web site at the bottom of this page.

The BAST workshop attracts an interesting balance of participants from the Semiconductor, EDA, and Automatic Test Equipment industries, and from universities. Donations to the BAST workshop of at least \$500.00 are welcomed. Donor companies may have their corporate logo included on the BAST souvenir. Following is a list of donor companies from BAST 2001 and 2002.
